OUTLOOK

Americans born today
now have a 50% chance
of developing cancer in
their lifetime.¹

1. A S Ahmad, N Ormiston-Smith and P D Sasieni, British Journal of Cancer, 2015;112:943-947

The value of having a critical illness or cancer insurance policy and Cancer Guardian together.

THIS IS JULIE

Julie has a family history of cancer and is very concerned about her risk, as well as her family's risk.

Because of this, Julie has a Critical Illness/Cancer policy.

The policy provides Julie with a financial safety net should she ever be diagnosed with cancer.

Julie also has Cancer Guardian, which provides her with affordable access to Advanced DNA Testing and dedicated services (not covered by her insurance) that can improve both prevention and survival.

Julie is comforted knowing she has both programs because, together, they help provide a comprehensive cancer package.

Cancer Support Specialists | Medical Records Platform | Advanced DNA Testing

CANCER GUARDIAN MEMBER TESTIMONIAL

“Everyone I have dealt with at Cancer Guardian has provided empathy and much needed support during my journey after having been diagnosed with my illness.

Their care and concern shines through in all that they have provided...from allowing you to talk through your emotions, providing resources so I learn more about my rare illness, calling weekly to see how I am doing, if I am staying on track with goals, providing direction when I am lost, to being by my side physically when visiting my doctor.

I am extremely grateful and comforted to have them on my team as they also bring a calmness among the roller coaster of emotions during this time.”

– Arlene Shutt, Cancer Guardian Member
